

EPSRC and MRC Centres for Doctoral Training in Tissue Engineering and Regenerative Medicine Joint Conference 2016

Friday 8th July

Renold Building, The University of Manchester

The EPSRC-MRC CDT in Regenerative Medicine warmly invites you to the 7th annual joint conference at the University of Manchester. This is one of the largest UK-based annual conferences in the area of Tissue Engineering and Regenerative Medicine. The programme will include presentations, a poster session and internationally renowned keynote speakers.

The conference is broad ranging, encapsulating the scope of cutting edge research in Regenerative Medicine. Research themes include:

- Biomaterials
- Stem Cell Biology
- Tissue Engineering
- Extracellular Matrix and Inflammation
- Translational Gene/Cell Therapy
- Nanomedicine

Confirmed keynote speakers for the conference are:

- **Professor Geoffrey Raisman FRS** – Chair of Neural Regeneration, UCL
- **Professor Kostas Kostarelos** – Professor of Nanomedicine, University of Manchester
- **Professor Liam Grover** – Professor of Biomaterials Science, University of Birmingham
- **Dr Saba Alzabin** – Senior Inflammation Research Scientist, Epistem Ltd.

Students from the EPSRC and MRC Centres for Doctoral Training in Tissue Engineering and Regenerative Medicine are invited to submit abstracts for oral or poster presentations. Students from other institutions or programmes are invited to submit abstracts for poster presentations. The deadline for abstract submission is 15 May.

Further details about the conference and how to apply can be found on our website:

www.regenmedcdt.manchester.ac.uk/conference2016

Lunch and refreshments will be provided on the day. The conference will close with a social reception. Any enquiries should be made to regenmed-cdt@manchester.ac.uk
